milena.milojevic2001@gmail.com

I am a second year biology student at Nord University in Bodø. I am interested in all aspects of marine life, protection of the environment as well as molecular biology and applied sciences. I have experience in conducting and writing a research and doing statistics in Rstudio. I enjoy field work and lab work as well and have experience in both. I love nature and life in Norway and would enjoy working at any location. I am open to any new experiences, eager to learn, gain knowledge in any field and explore new interests.

## EDUCATION

### **Bachelor of Science (B.S.) - Biology**

Aug 2021 - Jun 2024 (Expected)

*Nord University, Bodø*

### **High School Diploma - Natural Science department**

Sep 2016 - Jun 2020

*High School Svetozar Markovic, Nis, Serbia*

## EXPERIENCE

### **On call help**

Oct 2022 - Present

*Sakura fusion, Bodø*

- Helping out with setting tables, taking orders and welcoming people to the sushi restaurant
- Being highly efficient, hard working and able to always keep optimistic and light mood
- Fast learning and acquiring new skills is also a part of this job

### **Caffe and trampoline worker**

Aug 2022 - Present

*Trix Holding AS, Bodø*

- Working as part of a team to keep the park safe, clean and running.
- The job includes work at the reception, in cafe, as a jumping guard or organizing birthday parties
- Being enthusiastic and engaged at all times and facing challenges
- Norwegian language practice as well as patience to work with kids are main traits that I have acquired during my work there.

### **Participant in the Science Center**

Sep 2019 - Mar 2020

*Petnica Science Center, Petnica, Serbia*

- I participated in biology course and research
- Mainly researched topics regarding marine and micro biology and wrote papers guided by scientists at the center
- Attended lectures on different topics

## **Participant in the Science Center**

Oct 2018 - Mar 2020

*Petnica Science Center , Petnica, Serbia*

- I participated in psychology course and research
- I did multiple experiments and wrote papers guided by scientists at the center
- Attended lectures on different topics of psychology
- Made and presented original project: Psychology of Perceiving Art

## **VOLUNTEER**

### **Volunteer at Science festival**

Apr 2017 - Apr 2017

*Science festival 'Nauk nije bauk 9'*

- I was a part of the team that made and presented a project Chemistry of food.
- The stand was made to be engaging and had multiple practical experiments that visitors could do on the spot.
- I was participating in research and execution of the project as well as presenting it to the visitors and explaining each experiment, making it understandable for everyone including children.

### **Volunteer at the Science festival**

Apr 2018 - Apr 2018

*Science festival 'Nauk nije bauk 10'*

- Second year in a row, I was a part of the team that made a project presented on the science festival.
- The project was Chemistry Behind Art.
- I was presenting 20 renaissance paintings and the science behind the paint and colors used for painting them.
- Answering questions and making it understandable for the visitors was a part of my work as well
